- ANSI Cut: A5
- ANSI Puncture: 5
- ASTM F2878 Needle Puncture: A5

Product Details

Summary

BLADE Needleprick high-viz glove features textured synthetic palm for durable grip in oil in just the right places. Reinforced palms provide abrasion, slash and penetration protection offering ANSI Level 5 (4.78 Newtons) puncture protection as tested under ASTM F2878 needleprick puncture testing and Level A5 cut protection under ASTM ANSI of 2200+ grams. Needlestick puncture protection layers still allow the glove to be flexible enough for full range of hand movement. A fluorescent lime green offering high-viz advantages the glove also has a stretch-nylon back which provides great dexterity and unimpeded hand functioning. The close fit neoprene cuff provides a secure fit and the soft fabric patch on the thumb for wiping sweat or drippy noses. BLADE Needleprick glove is ideal for medium cut hazards and puncture protection such as steel rope handling, waste handling, small parts assembly with sharp edges, forestry, construction and industries where exposure to medium cut and puncture is present.
