BLADE Cut 5 Knit Sleeve With Thumb Hole

Code: BLC5SL39

Features

- Unit: Pair
- Size: One Size
- Length: 39cm
- Pack Qty: 12
- Carton Qty: 120
- Colour: Grey
- EN388: 454X

Product Details

Summary

Cut level 5 resistant liner Provides excellent protection against blade and point hazards. The breathable and flexible liner provides better comfort and fit than other stiffer alternatives. A superior option for glazing and sheet metal applications where forearm protection is a priority. The sleeve can be laundered at 40° water temperature increasing the products life and cycle rate. Thumb hole version provides better palm and wrist protection and restricts the sleeve from sliding up the forearm.
