- Liner Fabric: Polyester

Product Details

Summary

This glove has a palm and finger dip of black nitrile on a seamless nylon inner with elasticised wrist. It therefore offers all the protection of nitrile from water, chemicals and other compounds, while at the same time allowing the wearer to carry out fine mechanical tasks with their hands. Often called the glove you wear when you don't want to wear a glove but need to. It is tight fitting like a disposable glove but comes off easily and is easily reused. The lightweight open nylon back allows the glove to breathe.

Features and Benefits

- A palm and finger dip of black nitrile on seamless nylon inner with elasticised wrist
- Protection of nitrile from water, chemicals and other compounds
- Tight fitting like a disposable glove but comes off easily and is easily reused.
- Open nylon back allows the glove to breathe.
