Product Details

Developed by Armour Safety in response to the Covid19 crisis, this washable balaclava is designed for the food processing industry for food safety.

Balaclava mask features an outer polyester mesh plus a double protective layer made up of a layer of 100% pure cotton and a layer of polyester/cotton blend sewn internally. The mesh and fabric work together for moisture management and filtration performance, avoiding inner perspiration build up/transfer. Reduces moisture irritation 100% pure cotton provides the highest level of filtration of all natural and re-useable fabrics and has been included based on the recommendations of medical experts. Polyester is manufacturered product predominately used in textiles.
