Armour Chain Mesh Gauntlet Glove

Code: _CRCMGG150

Features

- Unit: Each
- Pack Qty: 1
- Carton Qty: 4

Product Details

Made with Manabo Chain Mesh from Germany that is recognised as the best in the world, this chain has plasma welded rings that are stronger and more hygienic than others. Gloves have shaped fingers for a better fit and we also sell glove stiffeners made from long life TPU in blue or white that hold the glove tight on the hand. With the wrist length gloves you have a choice of an adjustable webbing with stainless steel dome close around the wrist (most comfortable), a hook close (used where there can be no material on the glove) or having a spring which holds the glove on the wrist. With the cuff gloves there is strap or hook both at the wrist and at the top of the cuff to hold it tight on the arm. The most common cuff or Gauntlet glove has a 190mm cuff which takes it to just below the elbow. Easy to clean. Used by butchers, in food processing and anywhere where there is a high risk of cut. What is your hand or a finger worth? These gloves are also excellent for debudding grape vines.
