Flash Insulated 280mm - Class 0 (1000V)

Code: GLOVE0-280

Features

- Unit: Pair
- Pack Qty: 1
- Carton Qty: 12
- Size: 8, 9, 10, 9.5, 11
- Class: 0
- Colour: Red
- Length: 280mm
- IEC 60903:2014

Product Details

The latest advancement in personal protection - The Flash® Insulated Glove 280mm - (1000V) | Class 0. Engineered for safety and performance, these gloves are an essential safeguard for professionals working in environments with electrical hazards up to 1000V. Crafted by Flash®, a leading name in safety equipment, these gloves combine innovation with stringent safety standards.

Certified to IEC 60903:2014, the Flash® Insulated Gloves offer unparalleled protection against electrical risks, ensuring your safety while handling high-voltage tasks. The gloves feature a rolled edge cuff design, enhancing durability and wearability. The 280mm length provides extensive coverage, securing not just the hands but also a part of the forearm against electrical exposure.

The Flash® Insulated Gloves are meticulously designed for comfort without compromising on safety. The ergonomic fit allows for maximum dexterity, ensuring that tasks can be performed with ease and precision. The gloves' robust construction is complemented by their flexibility, which allows for a comfortable fit even during extended use.

Features and Benefits

- 1000V Working Voltage Protection: Offers top-tier safety for electricians and other professionals working with or near high-voltage systems.
- Certified to IEC 60903:2014 Standards: Ensures the gloves meet global safety requirements for electrical protection.
- Rolled Edge Cuff: Enhances durability and comfort, making it easier to don and doff the gloves.
- 280mm Length: Provides superior coverage, extending safety beyond the hands to the lower forearms.
- Ergonomic Design: Ensures comfort and dexterity, allowing for precise and safe handling of tools and equipment.
