Product Details

Introducing Slyder Gloves, specifically designed for workers removing rotisserie chickens from the skewer. These gloves offer unparalleled durability and protection, with a reinforced thumb area that ensures long-lasting performance. Experience exceptional hand safety and comfort with Slyder Gloves.

Constructed with 100% neoprene material, Slyder Gloves are fully liquid proof and can withstand radiant temperatures up to 450°F. The 17" length provides ample coverage, while the double cotton jersey liner enhances comfort. The etched finish guarantees a sure-grip handling experience, and the gloves are treated with Sanitized® Actifresh to reduce bacterial and fungal buildup.

Featuring a patented reinforced thumb area with a Green Wear Indicator Patch, Slyder Gloves offer superior durability and easy identification of wear. Available in sizes M and L, these gloves are the ideal choice for rotisserie chicken removal tasks.

Features and Benefits:

- 100% neoprene gloves designed for removing rotisserie chickens from the skewer.
- Fully liquid proof and can withstand radiant temperatures up to 450°F.
- Double cotton jersey liner for enhanced comfort.
- Etched finish for secure grip in various handling tasks.
