- AS/NZS 1337.1:2010

Product Details

These are our classic rimless safety glasses with amber lenses, making them ideal for work environments with lower levels of light. The amber tint automatically brightens and adds contrast to environments that would otherwise be hard to see, while also reducing eyestrain. These safety glasses are suitable for night-time and early morning work, or any environment where there is inadequate lighting for clear safety glasses.

The glasses feature medium impact lenses and meet the AS/NZS1337 standards, so you know that you and your team will be protected while wearing them. The glasses feature 99% UV treatment, so your eyes are protected from sunlight. The lenses also have gone through anti-scratch and fog treatment, making them versatile and dependable. For added strength, they also feature high impact resistant polycarbonate temples that are frame screwed.

These are reliable safety glasses that you can chuck on and forget about. They'll protect you, are comfortable to wear, and are tough as well.

Features and Benefits

- Amber medium impact lens
- Black temple and anti-scratch coating
- 99% UV treatment.
- Polycarbonate lens with anti-scratch and anti-fog treatment.
- High impact resistant polycarbonate temples that are frame screwed - making the eyewear durable and strong.
- Complies with AS/NZS1337 standards

If you're after some amber safety glasses for your workplace, then you can't do better than these. Make sure you order today.
