Product Details

Strong and versatile, our ABS Hard Hats offer you durable protection in hazardous work environments. The high-density ABS shell, along with the full brim and secure harness makes them more reliable than other models. With these hard hats, you and your team will be well-protected in most high risk job sites.

The more comfortable a hard hat is, then the more likely it'll stay on the team member's head. These hard hats are lighter than HDPE alternatives, making them more comfortable, and are also more versatile. They feature high-quality ratchet adjustment for a secure fit, as well as a fibre tape harness, making them comfortable to wear over extended periods.

They also have an attachment slot that fits most major brand accessories, so they can be customized to suit the specific requirements of your workplace. The vented design of these hard hats also makes them suitable for working outdoors and in hot environments.

Features and Benefits

- ABS high density shell
- Full brim for added face protection
- Gutter lip for water collection and dispersion
- Attachment slot fits major brand accessories
- High quality ratchet adjustment for a secure dependable fit and comfort
- Chinstraps sold separately, complies with EN397
