Armour Disposable Respirator Carbon Valve Mask - P2

Code: DMP2VC

Features

- Unit: Box
- Pack Qty: 12
- Carton Qty: 10
- Filter Rating: P2
- AS/NZS 1716:2012

Product Details

Similar to our other metal free disposable respirators, but with additional active carbon filter layer to resist acid vapors, such as H₂S, SO₂, H₂, N₂ and micro dust Special 4-Ply pleated design, high filtration and static electricity material.

Will protect against all thermally generated contaminants and metallic fumes such as those produced during smelting or welding. Next level up – P3 – requires full face protection and usually requires mechanical filtration to protect against highly toxic dusts and/or powders.

Made of loaded polypropylene – 4 ply – to resist micron sized particles. Outside layer made of active carbon to resist acid vapours like H₂S, SO₂, H₂, N₂ and micro-dust.

Silicon exhalation valve resists dust while providing ease of breathing for extra comfort while working without risk of contamination.

Adjustable nosepiece and inner foam provide for a custom seal for different face sizes and shape.

Double elastic straps hold the mask tight and in place during use
