Armour Disposable Respirator Carbon Valve Mask - P2

Code: DMP2VC

Features

- Unit: Box
- Pack Qty: 12
- Carton Qty: 10
- Filter Rating: P2
- AS/NZS 1716:2012

Product Details

This metal-free disposable respirator features an active carbon filter layer to resist acid vapors (H₂S, SO₂, H₂, N₂) and micro dust. Its 4-ply pleated design offers high filtration and static electricity material. It protects against thermal contaminants and metallic fumes from smelting or welding. Made of loaded polypropylene, it resists micron-sized particles. The silicon exhalation valve ensures ease of breathing, while the adjustable nosepiece and inner foam provide a custom seal. Double elastic straps keep the mask secure during use.

Feature and Benefits

- Active Carbon Filter Layer: Resists acid vapors (H₂S, SO₂, H₂, N₂) and micro dust.
- 4-Ply Pleated Design: Offers high filtration and static electricity material.
- Thermal and Metallic Fume Protection: Suitable for smelting or welding.
- Loaded Polypropylene Construction: Resists micron-sized particles.
- Silicon Exhalation Valve: Ensures ease of breathing and comfort.
- Adjustable Nosepiece and Inner Foam: Provides a custom seal for different face sizes and shapes.
- Double Elastic Straps: Keeps the mask secure during use.
