UNDERSTANDING NEW GLOVE & SLEEVE PPE STANDARDS

International (ISO) and Australian/New Zealand standards classify and communicate the quality and protection levels of PPE (personal protection equipment). Numeric codes and symbols are used for specifying the correct level of protection for their task. Matching the right product to the appropriate risk can also help with cost controls. These ratings are earned via appropriate testing under the supervision of a third party registered certifying body.

ABCD

1 ABRASION:
New abrasion paper used in testing.

2 CUT:
New procedure for COUPE TEST/INDEX which also determines if dulling occurs. If dulling occurs, the new EN ISO 13997 test method becomes the reference whilst the COUPE TEST/INDEX would only be indicative.

3 IMPACT:
Test method for areas claiming impact protection.
